WARRIOR

STRENGTH FROM WITHIN

For over 100 years, since 1905, Marion has stood for quality, made-in-Wisconsin workmanship in truck bodies and cabs. Our full line of Rescue and Fire Apparatus is available in all-stainless steel construction, including the substructure – made of stainless tubing for extra strength. All welders at Marion are certified on-site to the American Welding Society D1.3 standard for Stainless Steel. Additionally, Marion's welding instructor is the 1996 Howard E. Adkins award winner as instructor of the year for the entire United States. All plumbing, piping *and valves* are made of stainless steel. Custom or Commercial chassis is your choice with a Marion.

Marion's Warrior™ Series stainless trucks come with classic Marion features like multiplexed wiring, true total customization throughout the build process, attention to detail and ongoing website photo updates of your truck.

For lasting value and quality, make it a Warrior™ from Marion.

SAFETY THROUGH STRENGTH

Rescue Squad crew safety is maximized through the Warrior's rugged stainless steel framework.

CORROSION-FREE LONGEVITY

The use of stainless steel throughout the vehicle insures longevity and an in-service life that is second to none.

UNLIMITED OPTIONS

Warrior configurations are only limited by your imagination. Virtually any option can be configured to your vehicle.
